

Project: **CARGO, Brnik, 2019**

Year of implementation: **2019**  
Object: **Logistic Centre CARGO**  
Town: **Brnik**  
Architecture: **Protim Ržišnik&Perc**  
Investor: **Cargo-partner**

Type of works performed by Alu alprem:  
**Facade glazing**  
**Windows and doors**  
**Skylight and glass balustrades**  
**Internal glazing**

Materials:  
**Wicona Wictec 50 HI**  
**Wicona Wicline 75 evo**  
**Wicona Wictec 50FP EI30**  
**Schüco 65**

Key words:  
**Short deadline for installation**  
**Participation in project preparation**

Close to the Ljubljana Airport, the international logistics giant Cargo Partner has built their new logistic centre for Central and Eastern Europe with a total floor area of about 30.000 m<sup>2</sup>.

We made all aluminium structures and glazed elements. In the first phase, we obtained a contract for the facade and later on also for the implementation of all internal glazing.

The facade design reduces the building's energy consumption. Internal glazing is smoke-proof and achieves a high level of sound insulation.

We almost had a year for the preparation of all works. The majority of elements was produced based on the previously harmonised plans. The time for the installation was very limited and the installation took place predominantly in winter months.

We completed all works in the foreseen deadlines.
