Doors
Sliding doors
Facade glazing

Materials:
Schüco AWS 70.HI
Schüco ADS 70.HI
Schüco FW50+

Key words:
Implementation based on plans
Uw max. 1.0 W/m²K

Efaflex, a well known producer of high-speed doors, has built a new office building in the vicinity of Landshut in Germany.

The company Alu alprem, d.o.o., has planned, produced and installed all aluminium-glass elements. All elements have first been theoretically planned and based on these plans later on also constructed. In order to ensure the functioning of such a way of working, coordination of all participants at the construction site was necessary.

Special emphasis was laid on safety glass and implementation details.
