Type of works performed by Alu alprem:

Doors

Windows

Fire-proof doors

Materials:

AluK 77IW/ID

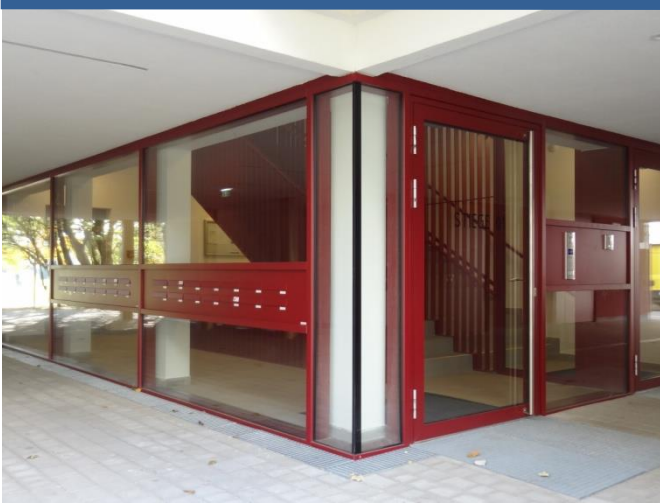

AluK SL50

Hueck Lava

Key words:

IBO ÖKOPASS

Uw < 0,9 W/m²K

This residential area in the 22th district of Vienna was the winner of the „Generation: Wohnen“ contest. The apartments were given to families in pairs – both families of the pair had to be related but of different generations. Families selected apartments next to each other or within the apartment complex.

The company Alu alprem produced aluminium joinery and mm alprem was responsible for the coordination of works. We produced and installed all aluminium doors, windows and fire-proof doors.

Special about this project was the colour of elements, which was different for each apartment complex.

For this project, Alu alprem used the fire-resistant system Hueck for the first time.
